E-Institute: <http://webtide.hccd1.org>

Courses in red are not available online.

Information and network security is a problem that almost every company faces; one of the biggest assets a company has is its data. In the field of information security and assurance, there are currently too few professionals to fill the positions available and in the growing global economy there will continue to be a need for professionals in the field. Graduates with associate degrees can be hired as entry-level Internet, security, network, systems or support administrators or specialists and will be prepared to integrate new security skills into their responsibilities as well as serve on corporate teams.
